MINES AND MINING STOCKS FINANCIAL AND COMMERCIAL

company's eastern officials to investigations should commence, is in the city for a flay or two after having been three weeks in the field. During that time he has gone over considerable territory owned and controlled by the company, as well as some of the properties owned by other companies and individuals on the borders of the Uintah reservation. Mr. McMillan gathered a great many samples of the various products of the field and a number of them will be forwarded east for testing purposes.

"I am not nearly through with my investigations yet," said Mr. McMillan yet, the properties of the eled and a number of them will be forwarded east for testing purposes.

"I am not nearly through with my investigations yet," said Mr. McMillan yet, the properties of the eled and a number of them will be forwarded east for testing purposes.

"I am not nearly through with my investigations yet," said Mr. McMillan yet, the progress made shows that the boys will make good and I shall be only too happy to pay them and bonus agreed upon."

Accompanied by Clarence K. McCornick, vice president, and Arthur E. Show, secretary of the company, Manager I gazin tomorrow to see how, the new those of concentrates per working the Howland tunnel, we shall be compelled to haul the ore by team from the mouth of the Columbus tunnel, Friday night there was practically and make good in the other side of the winter's work. A trestle has been built across the road up the hill and a track is being laid on it so that the development with the ore by team from the mouth of the Columbus tunnel, Friday night there was practically and make good and I so that the dump can be extended on the other side of the extended to haul the ore by team from the mouth of the Columbus tunnel, Friday night there was practically and make good and individuals on the borders of the field and a number of the was a products of the field and a number of the mouth of the columb

the business, and though I had but plant is behaving itself. hree weeks in the field here, I am ady now to say that there is not anhat presents such unmistakable evi-

strata of sandstones, shales and lim all lying practically horizontal. Fis sured here and there, of course, but wit no evidences of great eruptive distur bances as pile the rocks on end and make jumbled masses of them.

"I believe that underlying the highe stratas, where the oil is found seeping oil will be encountered. Many of the up sits of other hydro-carbons, such a agnitude of which can hardly be con ived at this time. I have been sim amazed with what I have thus fa en, and I am fully prepared to be

Company to Sink Wells.

"Yes, it is the purpose of the comwells, and when I came out here I supposed that it would require but little figuring to know just where to begin. I see, however, that the possibilities are so great in many places that I have come to the conclusion to make haste slowly. The field is a large one, larger, I believe, than in any other portion of the country, at least as far as surface indications go. That being true, I figure that a thorough prospecting of the ure that a thorough prospecting of the ground before drilling is commenced annot fail to be of advantage to the ompany. I have never been in a field where I felt as certain of results, re-sults which, in my humble opinion, will

exhibited at the company's offices great bottles of the crude oil which he had secured, as well as many samples of oil-bearing sands and the various hy-Iro-carbon minerals with which the region is so generously laden. He is glad of having been sent out here and promises that once operations are begun they will be prosecuted with vigor. He will return to the field and continue his investigations within a day or two

MAJESTIC EARNINGS.

Rattling Fine Tonnage Now Being Sent to Market.

According to W. M. White, who returned from Beaver county yesterday morning, Manager Ed F. Freudenthal of the Majestic company's properties is conducting a lively campaign of development, and at the same time making the ore extracted a great deal more

than meet operating expenses.

'Returns just had on a three-car consignment of lead carbonate ore from the company's Harrington-Hickory property," said Mr. White, "netted the carbonate or bight carbonal." the company \$300 a car. Eight carloads of the same kind of ore are now between the samplers and smelters and more were ready to bill out when I left carload a day is now coming out of the mine and being shipped in three to ight-carload lots. From the company's Old Hickory

plendid work in opening up the prop-rty, and from it he is sbipping now at the rate of three carloads a week, the ore, I understand, netting about the same as the lead ore from the Harring-ton-Hickory. This means that all of forty carloads of ore a month is now being produced and marketed, and that the company, from this source, will re-coive approximately \$12,000 per month, after all costs of transportation, assaymg. sampling, treatment, etc., are

"No attempt is being made to ship from the O. K. at the present time, every energy being bent in the direction of opening up the ore bodies. The east drift from the incline, on the 300foot level, has cut the mammoth ore shoot previously opened on the foot level, and it has proven bigger, richer and easier mined than on the level 100 feet above. All told, I understand, Manager Freuderthal is working only about forty-five men, but it is only the truth to say that with such force he is accomplishing wonders. Every property being operated is look ing better and better as the days go by, and there is everything to indicate great prosperity for the company

MODERNIZING OF ALTA. Columbus Con's Fine Milling Plant

Is in Commission. The new and modern milling plant of the Columbus Consolidated company, operating at Alta, went into commission Saturday morning and inside of sion Saturday morning sion Saturday morning and inside of sion Saturday morning and inside of sion Saturday morning sion Saturday morn

UINTAH FIELDS

Two hours it was chewing up ore like a veteran, Such, in brief, is the word given by Manager Trony Jacobson yes, the day, after spending several days at many and witnessing the starting up of the plant. Saturday noon Manager Jacobson in wited "all hands and the pump" at camp to drink and smoke up to the success of the new plant, considering the event of sufficient importance to hold a modest joilification. Alta is one of the oldest mining camps in the state. It has produced a great many millions of dollars in the years gone being the state. It has produced a great many millions of dollars in the years gone being the state. It has produced a great many millions of dollars in the years gone being the state of the plant to turp a wheel there. It marks the real beginning of a new rain that district and the Columbus Consolidated Company is entitled to all credit for its neve and energy for starting the beat rough the year we shall be running the plant a gar Jacobson, "we expect to be puting 160 tons of crude ore a day through the mill: before the end of the year we shall be running the plant at out here by the Pittsburg-Salt Lake oli company's eastern officials to investigate the field and determine where op-

of the east and southern states and have spent the major portion of my life again tomorrow to see how the new

FROM NEW BONANZA CAMPS.

John A. Kirby Impressed With Goldfield and Tonopah.

John A. Kirby, who has been investi-

vances in Many Stocks.

Business on the mining exchange the showing seems marvelous. In Pennsylvania, Indiana, Ohio, or elsewhere east and south of the Rocky mountains where oil and gas has been found and produced, such conditions as the Uintah field presents would drive people wild with excitement. Why the field here has been neglected so long is beyond my comprehension.

Says Formation Is Ideal.

"The formation is ideal and, so far as I have thus far been able to discover, it has been less disturbed than in any other region I was ever in. I find the other gating mining propositions at Tonopah, Goldefild and some of the other lively camps of Nevać, for the greater por-Mr. Kirby said that he was much impressed with the camp of Goldfield and had no doubt in the world that the district would prove a permanent and very productive one. The camp, he said, was growing at a marvelous pace, faster than any one could believe who had not been there. The mines are

had not been there. The mines are proving up better every day, and new discoveries were of frequent occurrence. The railroads are congested with business and he could not see where relief was coming from until the narrow gauge lines, had been standardized. This work is already under way, but it will be many months before it can be completed under most favorable circumstances. favorable circumstances.

The mines of Tonopah, Mr. Kirby said, were in the pink of condition Their permanency and great strengt had already been established and within mearly every case are taken from sales made; otherwise the big price is quoted. Many stocks not enumerated have participated in the month's business, and in most cases they have shown marked in the month's business, and in the month's business, and in the month's business, and in the month's mines and \$3,000,000 in the Montana-Tonopah, be did not in the montana-Tonopah, be did not in the Montana-Tonopah, he did not consider were in the least exaggerated.

Nevada during the next couple of

to make a phenomenal record.

YANKEE'S PRESIDENT ARRIVES. John E. DuBois and Other Operators

Came in Yesterday.

John E. DuBois, president of the Yankee Consolidated and Blackbird Mining companies, accompanied by Charles J. North and B. N. Lehman, came in from their homes in Pennsylvania last evening to look after their interests in Utah. It is expected that Mr. DuBois will spend a couple of weeks here this time and, before he leaves, the presumption is that he will decide on a plan of development for the Blackbird properties, which adjoin Samuel Newhouse's Cactus bonanza, in Beaver county.

Within the next day or two Mr. DuRois will leave, with others, for an inspection of the Yankee Consolidated.

Tintic Miner: It is stated around town

In mining circles that his errand is a most important one.

It was reported from the east some time ago that foreign interests were seeking a foothold, in the Bingham camp and the Bingham Consolidated was mentioned as one of the propositions that was likely to foothold.

If was reported from the east some time ago that foreign interests were seeking a foothold, in the Bingham consolidated was mentioned as one of the propositions that was likely to foothold.

If was reported from the east some time ago that foreign interests were solded to the Silver King Consolidated of Park City, will inspect the Silver Shield today.

The local settling price of course was the settling price of cours camp and the Bingham Consolidated was mentioned as one of the propositions that was likely to find a home beyond the sea. Whether Mr. Bailey is here for the purpose of sizing up that proposition or not could not be learned yesterday, but the statement was made that the visitor would likely spend some little time in the surrounding camps. It is hardly to be expected that anything of a definite nature will be learned here of Mr. Bailey's movements or findings, but news of more than passing importance may confidently be expected before the year closes, if surortune, as it relates to Utah mining, is beginning to move and the chances for many things happening in the ranks of copper properties may be expected during the next few months.

NOW IN HARNESS.

United States Company's New Manager Assumes Charge.

ger Assumes Charge.

Waiter Fitch, the new general manager of the United States company's properties, arrived from Michigan with his family Saturday night, and yesterday morning found him at his post in the company's offices. When seen, Mr. Fitch pleaded that he was too much of a stranger to his new surroundings to know anything, though he expected to get into full swing before long.

During the afternoon he accompanied General Superintendent C. E. Allen to Bingham Junction, where he went to meet the men in charge and get a line on how matters were moving at the plant. Next he will visit the company's mines at Bingham and Tintic, and a week hence will be settled down to business.

Mining Notes

consider were in the least exaggerated. The Mizpah Extension, Beimont and several other properties had established their right to be called big mines and the camp was destined, in his opinion, to make a phenomenal record.

Peter Porter, secretary and treasurer of the Goldfield-Great Bend company. returned from a several weeks trio to camp Sunday night. He reports development work belng rapidly crowded at the property with most satisfactory results. Manager John Dern went out to Tin-tic yesterday to witness the new hoist-ing plant in operation and size up con-ditions underground at the mine.

Four cars of ore from Tintic, two from Stockton and one from Bingham were reported at the Pioneer sampler at Sandy yesterday.

Blackbird properties, which adjoin Operations were resumed in the lower Samuel Newhouse's Cactus bonanza, in levels of the Lower Mammoth yesterday

inspection of the Yankee Consolidated, where a large amount of development work has been done since he was here last spring. After that he will go south and, besides looking over the Blackbird properties, note the progress which has been made in the building of the new town of Newhouse and the mammoth reduction works.

FOREIGN EXPERT HERE.

Tintic Miner: It is stated around town that C. E. Loose's trip here this week was to divulge confidentially the report that the Victoria had "struck it" through Grand Central workings. Anyway the report reached Salt Lake and in the course of the week Victoria stock advanced a dollar, which would indicate that something has happened.

Willard F. Snyder, general manager, and E. J. Raddatz, superintendent, were passengers to the Honerine yesterday morning.

Speculation Is Rife Concerning Purposes of His Visit.

A. D. Bailey, a prominent Scotch mining engineer, identified with the Thardis Copper syndicate of Glasgow, arrived in the city from Sault St. Marie, Canada, Sunday evening and, while the object of his visit is kept a profound secret, there is an impression in mining circles that his errand is a most important one.

It was reported from the east some time ago that foreign interests were seeking a footbold.

In morning.

James Johnson, who is developing a fine plece of ground at Bingham, was in from camp yesterday. He states that he expects to make connections with the ore bodies through the tunnel which he is running within the next tew days. There is a fine surface showing on the claims and he is confident of proving up something out of the ordinary.

The Taylor & Brunton sampling works reported the receipt yesterday of six cars of ore from Tintic, four from Bingham, one from Tonopah and one from Miller one ford.

Manager H. S. Joseph Manager H. S. Joseph Scheman (1930)

pany is rapidity advancing in consequence.

Park Record: Arrangements are being made at the Daly-West for the installation of air hammer rock drills. The machine is virtually a hand drill, which is operated by compressed air instead of the usual hammer. One of wise machines, operated by a single man, can do the work of four men working double-handed, so that an idea of the saving in time and expense effected by their use may be gained. They are now being tried in the mine as an experiment and are working perfectly, so that the new drills will be installed permanently in the near future.

AT THE OPENING

The Wyoming which recently made a grant of the property of

ity & er. se	explanation must take account of the very general acceptance on Saturday that there would be a considerable outgo of gold this week and the indifference snown by the stock market then to that forecast. The influence of this movement was probably due to the discussion of the causes lying back of the movement in the financial conditions of the banks of Europe. It is a growing belief that besides the requirement of a further large Russian government loan there are other needs pressing on the German and the French money markets, the nature of which is yet obscure.	In the meantime May declined to 1.86. Final quotations on December were at 1.10%401.10%. May closed at 1.10%401.10%. Considering the sharp break in wheat prices, the corn market held remarkably firm. The market closed firm and at the highest point of the day. December opened 1.60% and the highest point of the day. December opened 1.60% and the highest point of the day. December opened 1.60% and the same at 45% and the same at 1.60% and the sa

Lake City, Utah.

Notice.

PURSUANT TO A RESOLUTION OF the board of directors of the Hurst Air Brake company, a corporation of Utah, a special stockholders' meeting of the stockholders of said corporation will be held on the 1st day of November, 1904, at the office of the company, 161 South Main street, Salt Lake City, Utan, for the purpose of electing officers and directors of said corporation, and for such other purposes and matiers as may properly be brought before said meeting.

JACOB N. ROCK,
President Hurst Air Brake Company.

Sixty Years' Experience of an Old Nurse.

Mrs. Winslow's Soothing Syrup is the prescription of one of the best female physicians and nurses in the United States, and has been used for sixty years with never-failing success oy millions of mothers for their children. During the process of teething its value is incalculable, it relieves the child from pain, cures diarrhoes, griping in the bowels and wind colic. By giving health to the child it rests the mother. Price 25 cents a bottle.
